<u>DOCUMENTS NEEDED</u>					
Closure Letter, and any conditional closure letter issued					X
Copy of most recent deed, including legal description, for all affected properties					X
Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties					X
County Parcel ID number, if used for county, for all affected properties					X
Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.					X
Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.					X
Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)					X
Tables of Latest Soil Analytical Results (no shading or cross-hatching)					X
Isoconcentration map(s), if required for site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.					
GW: Table of water level elevations, with sampling dates, and free product noted if present					
GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)					
SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour					X
Geologic cross-sections, if required for SI. (8.5x14" if paper copy)					
RP certified statement that legal descriptions are complete and accurate.					X
Copies of off-source notification letters (if applicable)					
Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW)					
Copy of (soil or land use) deed restriction (s) or deed notice if any required as a condition of closure

RE: **Final Closure**

Commerce # 53588-8057-50 WDNR BRRTS # 02-57-258417
Village of Spring Green Post Office, 150 S Washington St, Spring Green

Dear Mr. Smigielski:

The Wisconsin Department of Commerce (Commerce) has received all items required as conditions for closure of the site referenced above. This case is now listed as "closed" on the Commerce database and will be included on the Wisconsin Department of Natural Resources (WDNR) Geographic Information System (GIS) Registry of Closed Remediation Sites to address residual contamination. It is in your best interest to keep all documentation related to the environmental activities that were conducted.

If residual contamination is encountered in the future, it must be managed in accordance with all applicable state and federal regulations. If it is determined that any remaining contamination poses a threat, the case may be reopened and further investigation or remediation may be required.

Thank you for your efforts to bring this case to closure. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 266-0562.

Sincerely,

A handwritten signature in black ink that reads "Alan A. Hopfensperger". The signature is written in a cursive style.

RE: **Conditional Case Closure**

Commerce # 53588-8057-50 **WDNR BRRS # 02-57-258417**
Village of Spring Green Post Office, 150 S Washington St, Spring Green

Dear Mr. Smigielski:

The Wisconsin Department of Commerce (Commerce) has reviewed the request for case closure prepared by your consultant, Ramaker & Associates, Inc., for the site referenced above. It is understood that residual soil and groundwater contamination remains on-site. Commerce has determined that this site does not pose a significant threat to the environment and human health. No further investigation or remedial action is necessary.

During the groundwater sampling events conducted on February 17 & 19, 2004 the preventive action limit (PAL) for Naphthalene and Benzene was exceeded at sampling points B5 and B8 (Temp Well B8), at 13 parts per billion (ppb) and 1.4 ppb respectively. Commerce is issuing a PAL exemption, per NR 140.28(2), Wis. Adm. Code, for Naphthalene and Benzene at the referenced property.

The following conditions must be satisfied to obtain final closure:

- Soil bore hole abandonment form for B-7. Which was missing from the April 15, 2004 *Request for Case Closure*.

This letter serves as your written notice of "no further action". Timely filing of your final PECFA claim (if applicable) is encouraged. If your claim is not received within 120 days of the date of this letter, interest costs incurred after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 266-0562.

Sincerely,

Alan A. Hopfensperger
Hydrogeologist

SUBJECT: GIS Registry Packet
Village of Spring Green Post Office, 150 South Washington St., Spring Green, WI
BRRTS #: 02-57-258417 COMMERCE#: 53588-8057-50

Dear Mr. Hopfensperger:

Ramaker & Associates, Inc. is submitting a GIS registration packet for residual soil contamination, at the Village of Spring Green Post Office Site, per your request in your letter to the Village of Spring Green dated August 5, 2004. A registration checklist and supporting documents are attached with this letter. GIS registration fees have been submitted separately by the Village of Spring Green.

Sauk County uses parcel identification numbers to track properties. The subject property is identified with Parcel ID# 182-0190-10000. The site is located at 150 South Washington Street, Spring Green, Wisconsin. A recent certified survey of the property has been included with this packet. The survey was completed by Jewell A Division of Clark-Dietz, Inc. and was filed with the register of deeds office on June 2, 2004. The subject property is indicated as Lot 1 on the survey. The most recent deeds which were obtained for the property from the register of deeds office do not reference the most recent survey.

The geographic position of the site is described by the coordinates below. The coordinates were obtained from the WDNR GIS database, and form a polygon that approximates the shape of the subject property.

Site Polygon Description (WTM91 Coordinates in Meters)

Point 1; X = 514238, Y = 300393
Point 2; X = 514238, Y = 300340
Point 3; X = 514337, Y = 300353
Point 4; X = 514337, Y = 300381

Soil cuttings collected from the probe borings were thin spread on-site. It is estimated that less than 1.5 cubic feet of soil was disposed of this way. The amount of soil obtained from the boring was less than the volume of the probe borings, due to problems with sample recovery.

Purge water was thin spread on-site. The amount of purge water was minimal due the relatively small size of the 1-inch temporary wells. It is estimated that 12-gallons of purge water was thin spread at the site.

The groundwater preventive action limit (PAL) for naphthalene was exceeded at location B5. The PAL for benzene was exceeded at location B8 (Temp Well B8). No other regulatory values for groundwater were exceeded at the site. Groundwater elevation measurements were not collected as part of this site investigation. As a result, groundwater elevation tables and groundwater flow maps have not been included

September 23, 2004

Page 2

with this packet. Groundwater investigation results for nearby sites have indicated groundwater flows generally to the north.

A site plan showing boring locations is attached to the close out packet along with a table indicating analytical results for soil samples collected from the site. Soil contamination was detected at concentrations below NR 720 and NR 746 regulatory levels in borings B-4, B-5, B-6 and B-9. Soil contamination exceeding NR 720 standards for DRO and NR 746 soil screening levels for naphthalene was detected in B3 at a depth interval of 4 feet to 8 feet bgs. Soil contamination exceeding the NR 746 soil screening level for naphthalene was detected in B-8 at a depth of 6 feet bgs.

Contamination has not migrated off-site from the property and as a result letters were not sent to nearby landowners.

Contamination has not migrated off-site onto state, or federal government property and as a result these entities have not been notified. The property is owned by the Village of Spring Green, which has received copies of all site documentation.

If you have any questions or comments, please do not hesitate to contact our office.

Sincerely,

RAMAKER & ASSOCIATES, INC.

Ben Christianson, P.G.

P.O. Box 40
Spring Green, WI 53588

WHEREAS, the Village of Spring Green, a Wisconsin Municipal Corporation, is the owner of the above-described property.

Parcel Identification Number (PIN)

WHEREAS, one or more petroleum discharges have occurred on this property. Benzene-contaminated groundwater above ch. NR 140, Wis. Adm. Code, enforcement standards existed on this property at the following location(s) on the following date(s): benzene was present in monitoring well MW3 at a concentration of 6.62 micrograms per liter (ug/L) during an April 20, 1999 sampling event. For the approximate location of MW3, see Attachment B (Ramaker and Associates Groundwater Flow Direction - June 6, 1997 Map), which is hereby made a part of this restriction.

WHEREAS, it is the desire and intention of the property owner to impose on the property restrictions which will make it unnecessary to conduct further groundwater or soil remediation activities on the property at the present time.

WHEREAS, natural attenuation has been approved by the Department of Natural Resources to remediate groundwater contamination exceeding ch. NR 140, Wis. Adm. Code, groundwater standards within the boundaries of this property.

WHEREAS, construction of wells where the water quality does not comply with drinking water standards in ch. NR 809, Wis. Adm. Code, is restricted by chs. NR 811 and NR 812, Wis. Adm. Code. Special well construction standards or water treatment requirements, or both, or well construction prohibitions may apply.

NOW THEREFORE, the owner hereby declares that all of the property described above is held and shall be held, conveyed or encumbered, leased, rented, used, occupied and improved, subject to the following limitation and restrictions:

Anyone who proposes to construct or reconstruct a well on this property is required to contact the Department of Natural Resources' Bureau of Drinking Water and Groundwater, or its successor agency, to determine what specific requirements are applicable, prior to constructing or reconstructing a well on this property. No well may be constructed on this property unless applicable requirements are met.

If construction is proposed on this property that will require dewatering, or if groundwater is to be otherwise extracted from this property, while this groundwater use restriction is in effect, the groundwater shall be sampled and analyzed for contaminants that were previously detected on the property and any extracted groundwater shall be managed in compliance with applicable statutes and rules.

This restriction is hereby declared to be a covenant running with the land and shall be fully binding upon all persons acquiring the above-described property whether by descent, devise, purchase or otherwise. This restriction benefits and is enforceable by the Wisconsin Department of Natural Resources, its successors or assigns. The Department, its successors or assigns, may initiate proceedings at law or in equity against any person or persons who violate or are proposing to violate this covenant, to prevent the proposed violation or to recover damages for such violation.

Any person who is or becomes owner of the property described above may request that the Wisconsin Department of Natural Resources or its successor issue a determination that one or more of the restrictions set forth in this covenant is no longer required. Upon the receipt of such a request, the Wisconsin Department of Natural Resources shall determine whether or not the restrictions contained herein can be extinguished. If the Department determines that the restrictions can be extinguished, an affidavit, attached to a copy of the Department's written determination, may be recorded to give notice that this deed restriction, or portions of this deed restriction, are no longer binding.

By signing this document, Todd Miller asserts that he/she is duly authorized to sign this document on behalf of the Village of Spring Green, a Wisconsin Municipal Corporation.

IN WITNESS WHEREOF, the owner of the property has executed this Declaration of Restrictions, this 28th day of June, 2002.

RE: Village of Spring Green - Post Office
BRRTS# 02-57-258417 Commerce# 53588-8057-50

To Whom It May Concern:

To the best of my knowledge, the legal descriptions that are attached with this closure request, accurately describe the properties that fully contain the petroleum release area, which is the subject of this site closure request.

Mell Smigielski
